

Time for Polish superfruits!

DELNIWA

Rubus idaeus L.

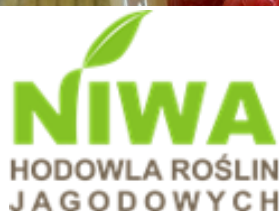

- ❖ **Breeder:** Niwa Berry Breeding Ltd.
- ❖ **Author:** Dr. Agnieszka Orzeł
- ❖ **Season:** early primocane variety
- ❖ **Plant:** upright canes, light green with dense thorns
- ❖ **Fruit:** Bright red, glossy fruit, lighter in colour than Polka, very sweet flavour, easily plugged and well presented to the pickers
- ✓ High natural sugar
- ✓ Good average berry weight
- ✓ High IQF % fruits
- ✓ *The most profitable variety among Polish primocane cv. for mechanical harvesting*
- ✓ Fruits have outstanding shelf life (8-9 days in 5°C), they are suitable for transport
- ✓ In vitro evaluation made in Niwa shows resistance to *Phytophthora ssp.*, proved by field observation in Kosovo.
- ✓ *Basing on our research Delniwa has more antioxidant capacity and total phenolic content than Polka.*
- ❖ **Variety usefulness:** the fresh market, processing, freezing
- ❖ **Susceptibility to diseases:** Tolerant to the main raspberry pests & diseases

Variety	Sosulbe Solid Content (% Brix)
Polka	9 a
Delniwa	12,6 b
Mapema	10 c
Himbo Top	9,7 a
Sugana	9 a
